

Fixed Bollard Series

Product Overview

Patent Pending

The Bottom Line:

SecureUSA's Fixed Bollard Series (SU-BX100 Series) is a fixed bollard barricade system consisting of several vertical bollards installed in a line or independently. Bollards are the solution of choice for protecting buildings and facilities in an urban setting. The bollard system delivers excellent Anti-Terrorist Vehicle Intrusion Protection, while maintaining comfortable and easy pedestrian access.

Fixed Bollard Features:

- Contemporary Design
- 28 to 36 Inch Heights
- 6 to 13 Inch Diameters
- 1 to 4 Foot Foundations
- Decorative Sleeves
- 15,000 lbs. @ 30, 40, & 50 mph
- Custom Design Options

Benefits:

Security & Access

SecureUSA's Fixed Bollard Series provides excellent physical security for your facility, yet allows your streetscapes to remain pedestrian friendly. In metropolitan areas the fixed bollard series can provide crash rated protection that meets ADA requirements and city access guidelines.

Customized Design

Just because it's a security bollard doesn't mean you can't have the bollard match your site's specific architectural design. The Fixed Bollard comes in several designs and paint schemes, provided by our extensive line of decorative sleeves, to enhance the look of your facility, while also providing the physical protection your facility needs.

Crash Rating

The Fixed Bollard Series comes in many different crash ratings to meet your facility's security requirements. Crash ratings range from a low security 15,000 lbs. @ 15 mph to a high security rating of 15,000 lbs. @ 50 mph. Regardless of your security requirement SecureUSA's Fixed Bollard Series has a bollard that will fit your needs.
